ABOUT VRAJ PACKAGING

We specialize in providing **packaging solutions** for various industries worldwide.

Vraj Packaging is equipped with a state-of-the-art plant & machinery and the in-house testing facilities help in ensuring quality products. Vraj Packaging is committed towards timely delivery & sales support.

In view of our ethics and principles, we concentrate on ensuring Quality Control measures and installing modern equipment to provide world-class packaging solutions to our customers.

The legacy of our management believed in "Customer First Ideology" and maintaining quality and commitment has been the priority. Carrying the legacy, we are proud of our present team that always puts customers' interests ahead of anything else.

- ✓ We can proudly assert that we have an excellent infrastructure by inducting machinery from highly reputed machinery manufacturers, which helps us maintaining QC standards.
- ✓ We have a quality check lab with well-equipped machinery at each stage of production, starting from the acquisition of raw materials till dispatch of the products.
- ✓ We go through several levels of inspection via trained and dedicated QC team who efficiently control all the operations and keep a check on production process.
- ✓ We deliver on our promise of exceptional quality in each and every product with the aid of our diverse experience and extensive industry knowledge.

We are committed to developing, manufacturing and supplying Products & Services of unmatched quality.

We house an International standard state-of-the-art manufacturing facility with a whopping manufacturing capacity of 1100MT per month.

Tape Plant
Tape Winders
Woven Looms
Lamination Plant
Flexo Printing Machine
Paper Tuber Machine
BOPP Tuber Machine
Valvomatic Machine
Twist Gusset Machine
HM & LD Liner Machine

All our products meet International standards in quality and specifications.

PP/HDPE Woven Sacks and Fabric

These bags are manufactured from the best virgin raw material, available in various colors & customizations.

Woven Sacks with Micro Perforation

Bags with micro holes help the hot air go out while packing the material in the bag.

Kraft Line Bags

These bags are robust, moisture-proof and can be customized as per customer requirements.

Metallised Paper Bag

The metallised film protects the contents from outside influences such as air, dampness, and grease.

Multiwall Paper Bag

These bags are made from extensible sack Kraft paper in 2-6 ply and can be customized as per requirement.

BOPP Bags

These are bags made from HDPE/PP fabrics available in various colors, sizes, and customizations.

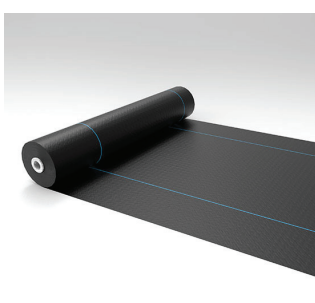

Retail Bags

Made from an interwoven polypropylene textile that gives them a good finish and makes them reusable.

HM & LD Liners

It adds a protective barrier to prevent items from spoiling and creates an air-tight seal that keeps perishables fresh.

PP Ground Covers

Ground covers are a great way to keep the weeds out of your way and achieve a nice looking land.

Air Dunnage Bags

Used for bracing loads, filling voids, protecting cargo from in-transit damage, and absorbing vibrations.
